## INCOME STATEMENT

The income statement reports the results of an entity's operations over a period of time, such as a year.
The Income Equation: Income (Loss) = Revenues + Gains - Expenses - Losses
The following are the elements of an income statement:

1. Revenues are inflows or other enhancements of assets or settlements of liabilities (or both) from delivering or producing goods, providing services, or other activities that qualify as ongoing major or central operations.
2. Gains are increases in equity (or net assets) other than from revenues or investments by owners.
3. Expenses are outflows or other usage of assets or incurrences of liabilities (or both) from delivering or producing goods, providing services, or other activities that qualify as ongoing major or central operations.
4. Losses are decreases in equity (or net assets) other than from expenses or distributions to owners.

## BALANCE SHEET

The statement of financial position, also called the balance sheet, reports the amounts of assets (items of value), liabilities (debt), and equity (net worth) and their relationships at a moment in time, such as at the end of the fiscal year.

## ELEMENTS OF THE BALANCE SHEET

A. Assets are resources controlled by the entity as a result of past events. They represent probable future economic benefits to the entity. Examples include inventory; accounts receivable; investments; and property, plant, and equipment.
B. Liabilities are present obligations of the entity arising from past events. Their settlement is expected to result in an outflow of economic benefits from the entity. Examples include loans payable, bonds issued by the entity, and accounts payable.
C. Equity is the residual interest in the assets of the entity after subtracting all its liabilities. Examples include a company's common stock, preferred stock, and retained earnings
2.1. Prepare an income statement based on the following information: Fees Income, $\$ 38,000$; Supplies Expense, $\$ 16,000$; Salaries Expense, $\$ 12,000$. Miscellaneous Expense, \$7,000

SOLUTION

| Income Statement |  |  |
| :--- | ---: | :---: |
| Fees Income |  | $\$ 38,000$ |
| Expenses |  |  |
| Supplies Expense | $\$ 16,000$ |  |
| Salaries Expense | 12,000 |  |
| Miscellaneous Expense | 7,000 |  |
| Total Expenses |  | 35,000 |
| Net Income |  | $\$ 3,000$ |

2.2. Based on Prob. 2.1, what would the net income or net loss be if, in addition to the listed expenses, there was an additional expense of $\$ 5,000$ charged to Rent?

SOLUTION

| Income Statement |  |  |
| :--- | ---: | ---: |
| Fees Income |  | $\$ 38,000$ |
| Expenses |  |  |
| Supplies Expense | $\$ 16,000$ |  |
| Salaries Expense | 12,000 |  |
| Rent Expense | 5.000 |  |
| Miscellaneous Expense | 7,000 |  |
| Total Expenses |  | 40,000 |
| Net Loss |  | $\$ 2,000$ |

Note: When expenses exceed income, a net loss results. This will have the effect of reducing capital.
2.3. The following information was taken from an income statement: Fees Income, $\$ 14,000$; Rent Expense, $\$ 2,000$; Salaries Expense, $\$ 5,000$; Miscellaneous Expense, $\$ 1,000$. If the owner withdrew $\$ 2,000$ from the firm, what is the increase or decrease in capital?

## SOLUTION

There are two steps to solving this problem:

1. Prepare an income statement.
2. Determine increases or decreases in capital by subtracting the drawing (withdrawal) from the net income.

2.4. Based on the information in Prob. 2.3, if the withdrawal were $\$ 9,000$ instead of $\$ 2,000$, what would the increase (decrease) become?

## SOLUTION

If the withdrawal is larger than the net income, a decrease in capital will result.

| Net Income | $\$ 6,000$ |
| :--- | ---: |
| Drawing | $\underline{9,000}$ |
| Decrease in Capital | $\$ 3,000$ |

2.5. If the Capital account has a balance on January 1 of $\$ 32,000$, what will be the balance on December 31 (a) based on Prob. 2.3? (b) based on Prob. 2.4?

## SOLUTION

(a)
Capital, January 1
$\$ 32,000$
Net Income
\$6,000
Less: Drawing 2,000
Increase in Capital
Capital, December 31

$$
\frac{4,000}{\$ 36,000}
$$

(b)
Capital, January 1
Net Income
Less: Drawing
Decrease in Capital
Capital, December 31

$$
\$ 32,000
$$

$$
\begin{array}{r}
3,000 \\
\$ 29,000 \\
\hline
\end{array}
$$

2.6. Based on the following information, determine the capital as of December 31, 19X8: Net Income for period, $\$ 18,000$; Drawing, $\$ 6,000$; Capital (January 1, 19X8), $\$ 20,000$.

## SOLUTION

| Capital, January 1, 19X8 |  | $\$ 20,000$ |
| :--- | ---: | ---: |
| Net Income | $\$ 18,000$ |  |
| Less: Drawing | 6,000 |  |
| Increase in Capital |  | 12,000 |
| Capital, December 31, 19X8 |  | $\$ 32,000$ |

2.7. Based on the following information, determine the capital as of December 31: Capital (January 1), $\$ 26,000$; Net Income, $\$ 18,000$; Drawing, $\$ 20,000$.

SOLUTION

| Capital, January 1 |  | $\$ 26,000$ |
| :--- | ---: | ---: |
| Net Income | $\$ 18,000$ |  |
| Drawing | 20,000 |  |
| Decrease in Capital |  | 2,000 |
| Capital, December 31 |  | $\$ 24,000$ |

Note: It is possible to withdraw more than net income, provided that your beginning capital has an adequate balance. This will result in a decrease in capital, which will be subtracted from the beginning capital
2.8. Determine the capital as of December 31, given the following information: Capital (January 1), $\$ 30,000$; Net Loss for period, $\$ 18,000$; Drawing, $\$ 4,000$

SOLUTION

| Capital, January 1 |  | $\$ 30,000$ |
| :--- | ---: | ---: |
| Net Loss | $\$ 18,000$ |  |
| Drawing | 4.000 |  |
| Decrease in Capital |  | 22,000 |
| Capital, December 31 |  | $\$ 8,000$ |

2.9. Based on the following information, determine the capital on December 31:

| Cash | $\$ 6,000$ |
| :--- | ---: |
| Supplies | 400 |
| Equipment | 8,000 |
| Accounts Payable | 4,500 |
| Notes Payable | 2,500 |

## SOLUTION

| ASSETS |  |
| :--- | ---: |
| Cash | $\$ 6,000$ |
| Supplies | 400 |
| Equipment | 8,000 |
|  |  |
| Total Assets | $\$ 14,400$ |

LIABILITIES AND OWNER'S EQUITY

| Accounts Payable | $\$ 4,500$ |
| :--- | :---: |
| Notes Payable | 2,500 |
| Total Liabilities | $\$ 7,000$ |
| Capital | $\underline{7,400^{*}}$ |
| Total Liabilities and Owner's Equity | $\$ 14,400$ |

* $\$ 14,400$ (Assets) $-\$ 7,000$ (Liabilities) $=\$ 7,400$ (Owner's Equity).
2.10. Selected accounts of the Ruez Company produced the following balances:

|  | January 1 | January 31 |
| :--- | :---: | :---: |
| Assets | $\$ 16,000$ | $\$ 19,000$ |
| Liabilities | 4,000 | 3,000 |

What was the net income of the firm, assuming that there were no withdrawals?

## SOLUTION

| Capital, January 1 | $\$ 12,000^{*}$ |
| :--- | :--- |
| Capital, January 31 | $16,000^{* *}$ |
| Increase in Capital | $\$ 4,000$ |

Because there was no drawing, $\$ 4,000$ must also be the net income, because net income minus drawing equals increase in capital.

* $(\$ 16,000-\$ 4,000)$. Based on the concept assets - liabilities = owner's equity.
** $(\$ 19,000-\$ 3,000)$. Based on the concept, assets - liabilities = owner's equity.
2.11. Based on the information in Prob. 2.10, determine the net income if $\$ 1,500$ was withdrawn from the company.

## SOLUTION

Capital, January 1
Capital, January 31
Increase in Capital
$\$ 12,000$
16,000
$\$ 4,000$

We know that net income - drawing = increase in capital.
Therefore, net income $-\$ 1,500=\$ 4,000$. Net income must be $\$ 5,500$.
