E14-8 Presented below are three independent situations
(a) CeCe Winans Corporation incurred the following costs in connection with the issuance of bonds: (1) printing and engraving costs, $\$ 12,000$; (2) legal fees, $\$ 49,000$; and (3) commissions paid to underwriter, $\$ 60,000$. What amount should be reported as Unamortized Bond Issue Costs, and where should this amount be reported on the balance sheet?
(b) George Gershwin Co. sold $\$ 2,000,000$ of 10\%, 10-year bonds at 104 on January 1, 2014. The bonds were dated January 1, 2014, and pay interest on July 1 and January 1. If Gershwin uses the straight- line method to amortize bond premium or discount, determine the amount of interest expense to be reported on July 1, 2014, and December 31, 2014.
(c) Ron Kenoly Inc. issued \$600,000 of 9\%, 10-year bonds on June 30, 2014, for \$562,500. This price provided a yield of $\mathbf{1 0 \%}$ on the bonds. Interest is payable semiannually on December 31 and June 30. If Kenoly uses the effective-interest method, determine the amount of interest expense to record if financial statements are issued on October 31, 2014.

(c) Provide the answers to the following questions.
(1) What amount of interest expense is reported for 2015?
(2) Will the bond interest expense reported in 2015 be the same as, greater than, or less than the amount that would be reported if the straight-line method of amortization were used?
(3) Determine the total cost of borrowing over the life of the bond.
(4) Will the total bond interest expense for the life of the bond be greater than, the same as, or less than the total interest expense if the straight-line method of amortization were used?

(B) the proper balance sheet presentation for the liability for bonds payable on the December 31, 2015

| Long-term Liabilities |  |
| :--- | :---: |
| Bonds payable, $13 \%$ (due on June 30,2034$)$ | $\$ 4,000,000$ |
| Premium on bonds payable* | 294,728 |
| ${ }^{*}(\$ 4,300,920-\$ 4,000,000)-(\$ 1,945+\$ 2,061+\$ 2,185)=\$ 294,720$ |  |
| Book value of bonds payable | $\underline{\$ 4,294,728}$ |

| (c)1 | Interest expense for the period from January 1 to June 30, 2015 | $\$ 257,939$ |
| :---: | :--- | :---: |
|  | Interest expense for the period from July 1 to December 31, 2015 | $\underline{257,815}$ |
|  | Amount of interest expense reported for 2015 | $\underline{\underline{\$ 515,754}}$ |

2. The amount of bond interest expense reported in 2015 will be greater than the amount that would be reported if the straight-line method of amortization were used.
Under the straight-line method, the amortization of bond premium is $\$ 15,046$ ( $\$ 300,920 / 20$ ).
Bond interest expense for 2015 is the difference between the amortized premium, $\$ 15,046$, and the actual interest paid, $\$ 520,000(\$ 4,000,000 \times 13 \%$ ). Thus, the amount of bond interest expense is $\$ 504,954$ ( $\$ 520,000-\$ 15,046$ ), which is smaller than the bond interest expense under the effectiveinterest method.

| 3. | Total interest to be paid for the bond $(\$ 4,000,000 \times 13 \% \times 20)$ | $\$ 10,400,000$ |
| :---: | :--- | :---: |
|  | Principal due in 2034 | $\underline{4,000,000}$ |
|  | Total cash outlays for the bond | $14,400,000$ |
|  | Cash received at issuance of the bond | $\underline{(4,300,920)}$ |
|  | Total cost of borrowing over the life of the bond | $\underline{\$ 10,099,080}$ |
| 4. | They will be the same. |  |

E14-10 (Entries for Bond Transactions) On January 1, 2014, Aumont Company sold 12\% bonds having a maturity value of $\$ 500,000$ for $\$ 537,907.37$, which provides the bondholders with a $\mathbf{1 0 \%}$ yield. The bonds are dated January 1, 2014, and mature January 1, 2019, with interest payable December 31 of each year. Aumont Company allocates interest and unamortized discount or premium on the effective-interest basis. (Round answers to the nearest cent.)
(a) Prepare the journal entry at the date of the bond issuance.
(b) Prepare a schedule of interest expense and bond amortization for 2014-2016.

P14-1 (Analysis of Amortization Schedule and Interest Entries) The following amortization and interest schedule reflects the issuance of 10-year bonds by Capulet Corporation on January 1, 2008, and the subsequent interest payments and charges. The company's year-end is December 31, and financial statements are prepared once yearly

| AmortizationSchedule |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Year | Cash | Interest | Amount Amortized | CarningValue |
| $1 \backslash 1 \backslash 2008$ |  |  | $\$ 5,651$ | $\$ 94,349$ |
| 2008 | 11,000 | $\$ 11,322$ | 5,329 | 94,671 |
| 2009 | 11,000 | 11,361 | 4,968 | 95,032 |
| 2010 | 11,000 | 11,404 | 4,564 | 95,436 |

(a) Indicate whether the bonds were issued at a premium or a discount and how you can determine this fact from the schedule.
(b) Indicate whether the amortization schedule is based on the straight-line method or the effectiveinterest method, and how you can determine which method is used.
(c) Determine the stated interest rate and the effective-interest rate.
(d) On the basis of the schedule above, prepare the journal entry to record the issuance of the bonds on January 1, 2008.
(e) On the basis of the schedule above, prepare the journal entry or entries to reflect the bond transactions and accruals for 2008. (Interest is paid January 1.)
(f) On the basis of the schedule above, prepare the journal entry or entries to reflect the bond transactions and accruals for 2015. Capulet Corporation does not use reversing entries.
(a) The bonds were sold at a discount of $\$ 5,651$. Evidence of the discount is the January 1, 2008 book value of $\$ 94,349$, which is less than the maturity value of $\$ 100,000$ in 2017.
(b) The interest allocation and bond discount amortization are based upon the effective-interest method; this is evident from the increasing interest charge. Under the straight-line method the amount of interest would have been $\$ 11,565.10[\$ 11,000+(\$ 5,651 \div 10)]$ for each year of the life of the bonds.
