

# تطبيقات ميكاترونيك -1-

Lecture No. 3

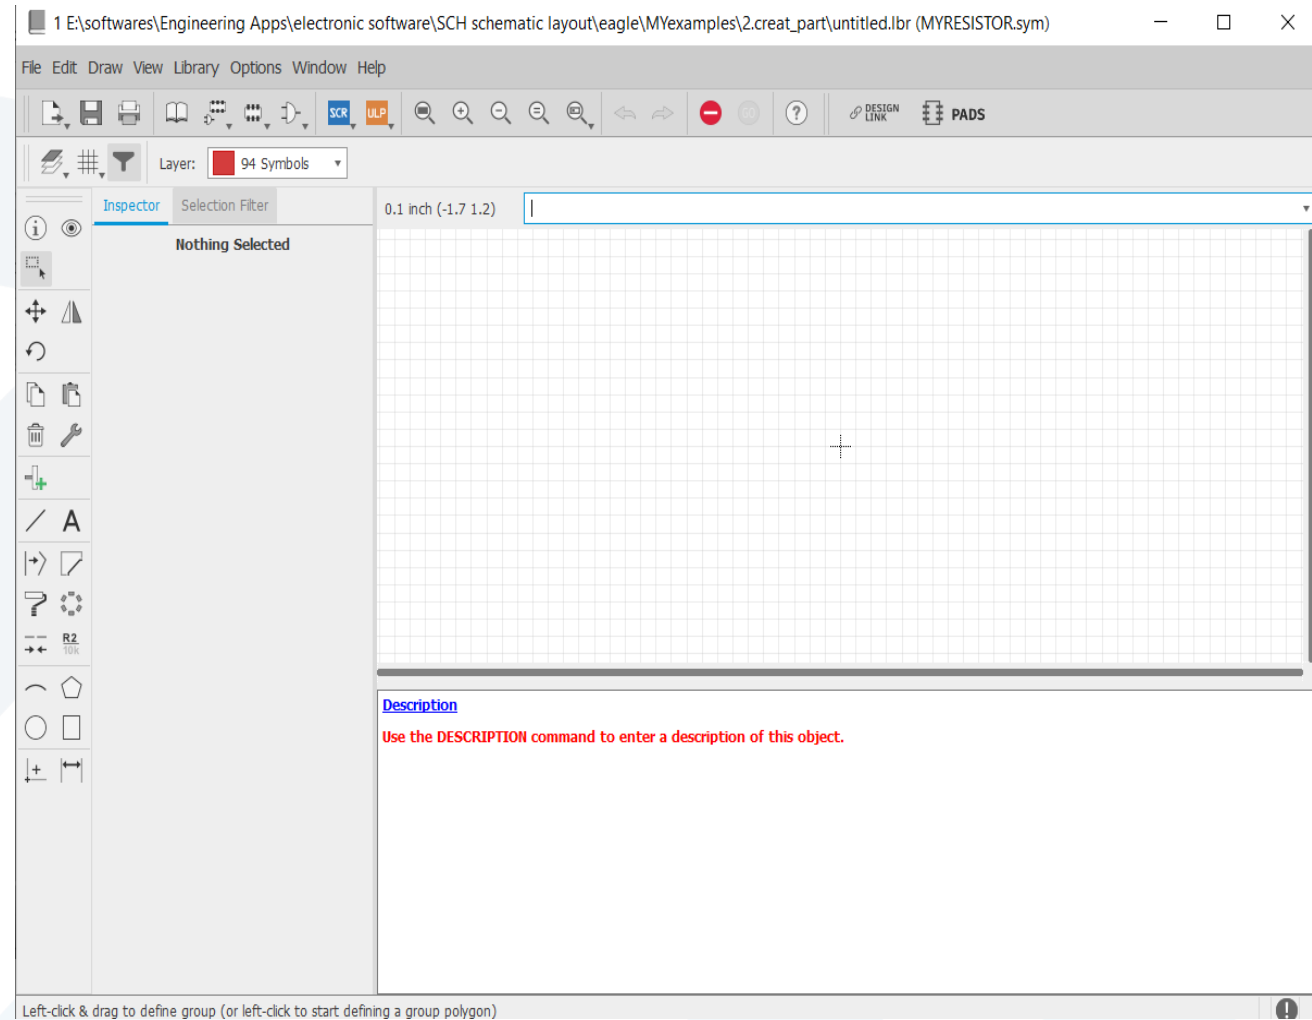

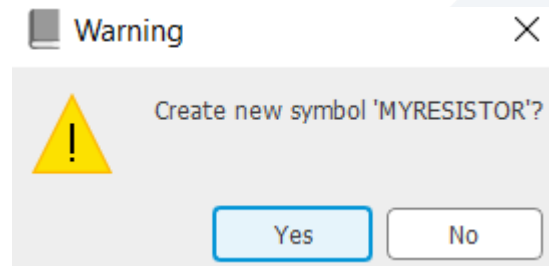

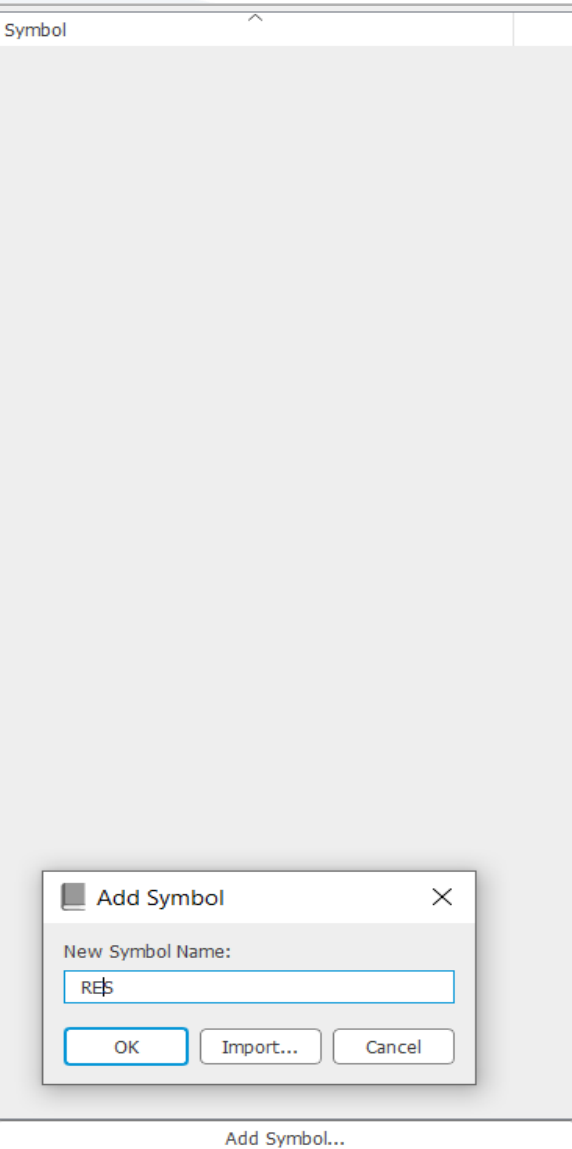

Create Library By Eagle part 3

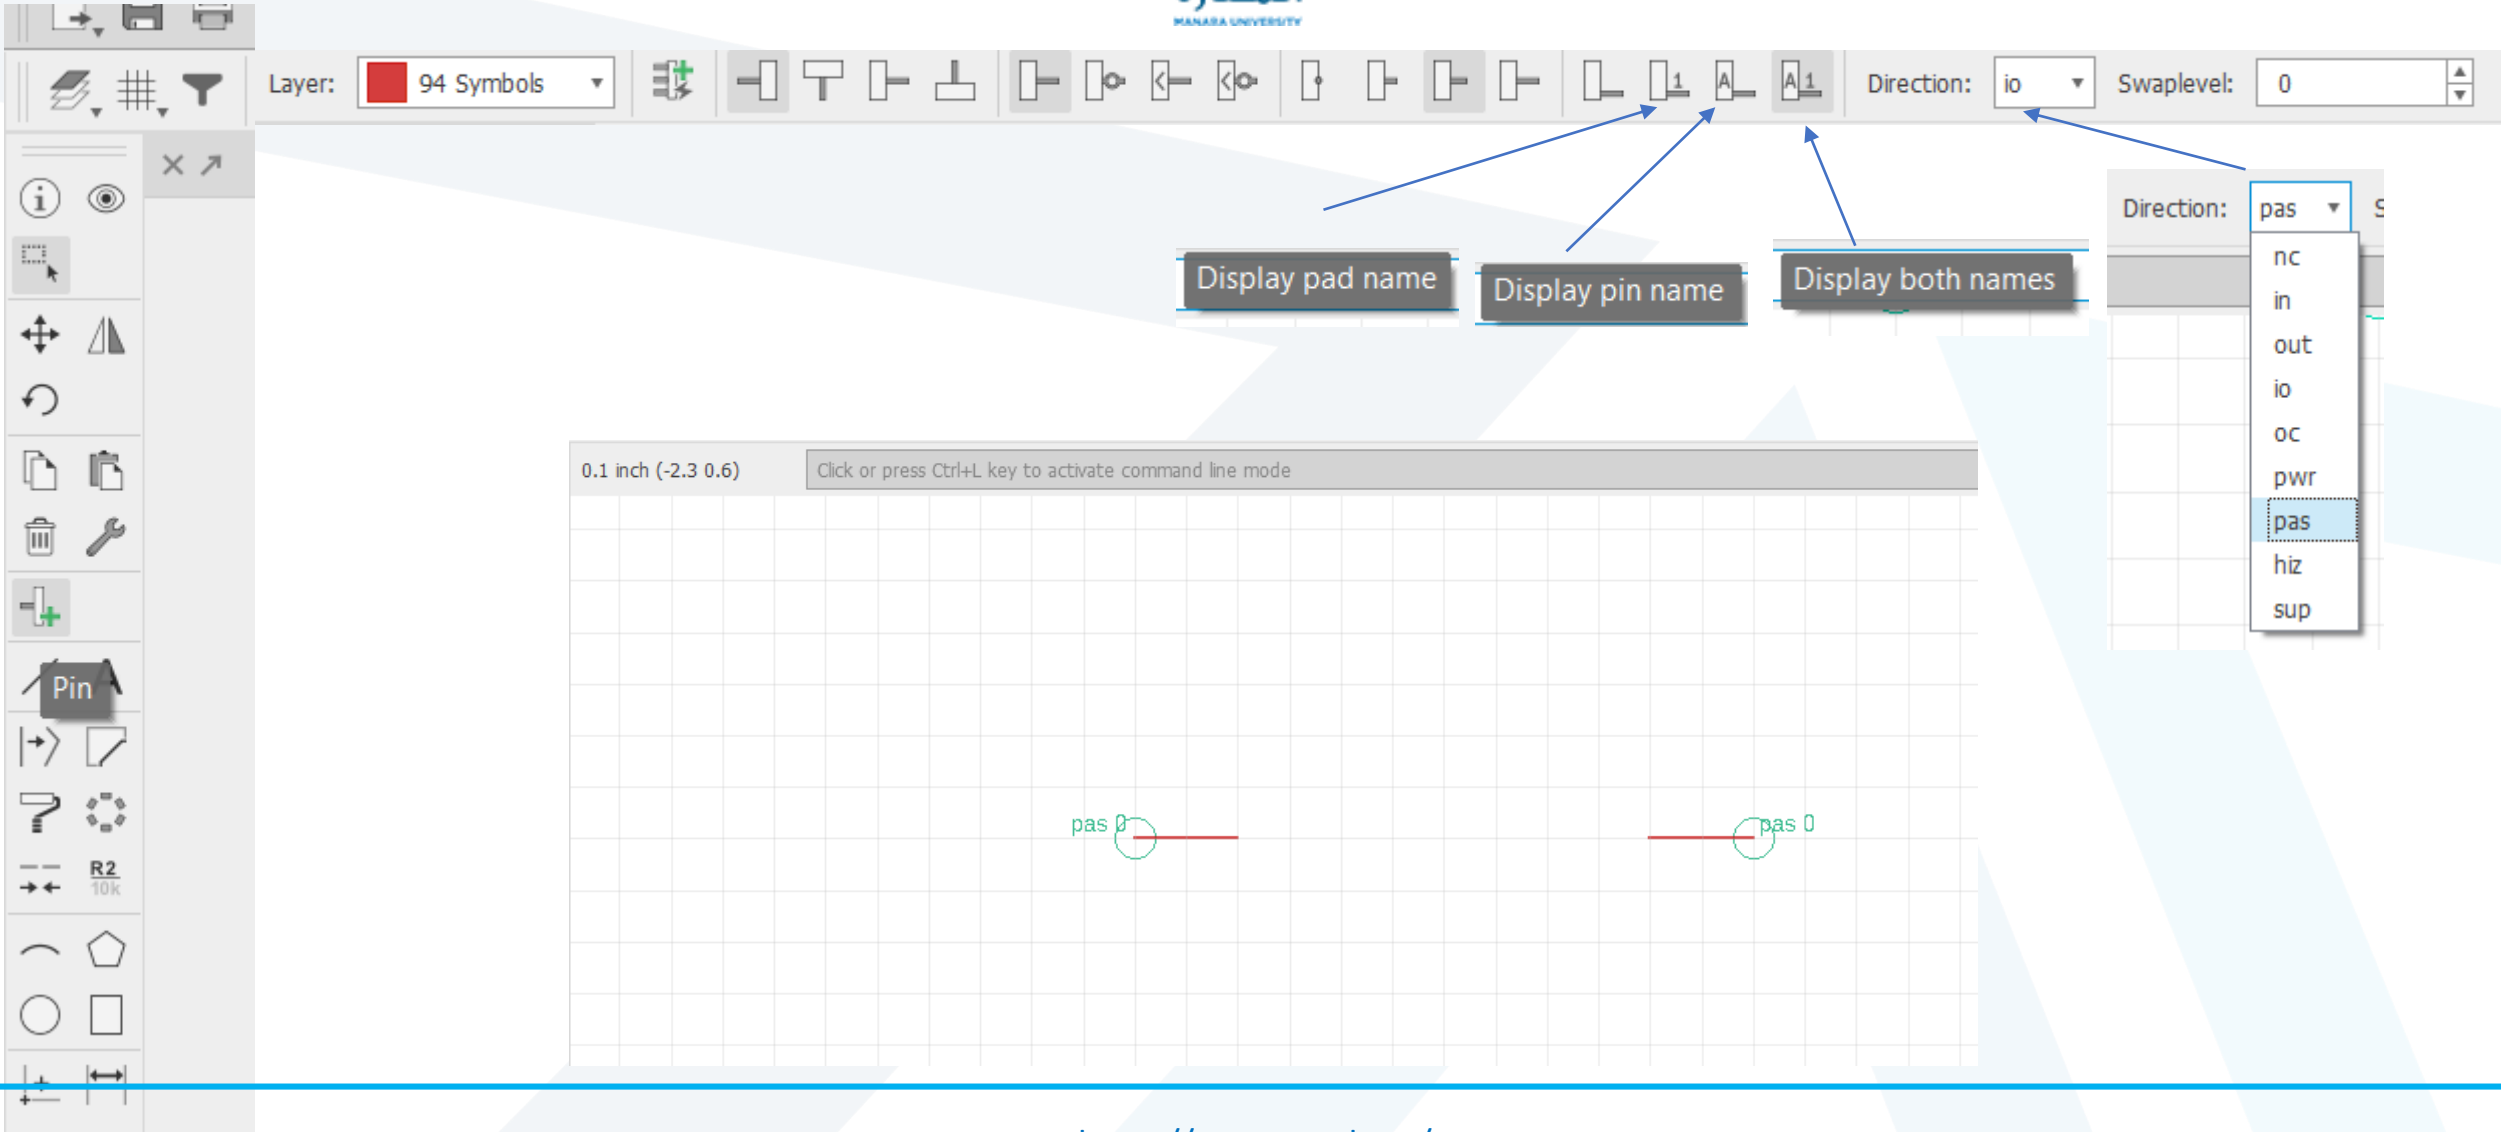

روبوت و أنظمة ذكية - سنة ثالثة

Dr. Eng. Essa Alghannam

2022-2023

The image shows a screenshot of a circuit design software interface. At the top, there is a toolbar with various icons for editing and placing components. Below the toolbar is a grid workspace. On the right side, a dropdown menu is open, showing a list of component types: nc, in, out, io, oc, pwr, pas, hiz, and sup. The 'pas' option is currently selected. Three blue arrows point from labels to specific icons in the toolbar: 'Display pad name' points to the '1' icon, 'Display pin name' points to the 'A' icon, and 'Display both names' points to the 'A1' icon. The 'Direction' dropdown is set to 'io' and 'Swaplevel' is set to '0'. The workspace shows two components labeled 'pas 0' connected by a red line. A status bar at the bottom indicates '0.1 inch (-2.3 0.6)' and provides a hint to click or press Ctrl+L to activate command line mode.

RES

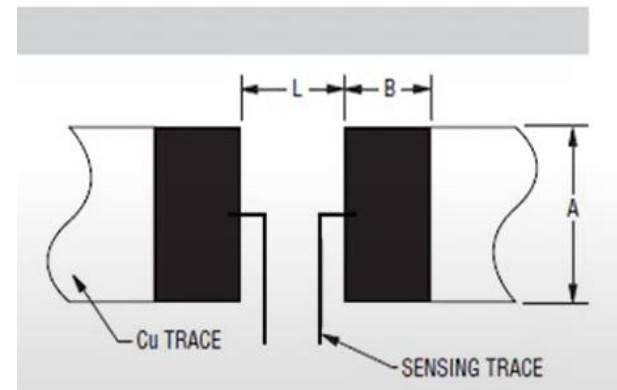

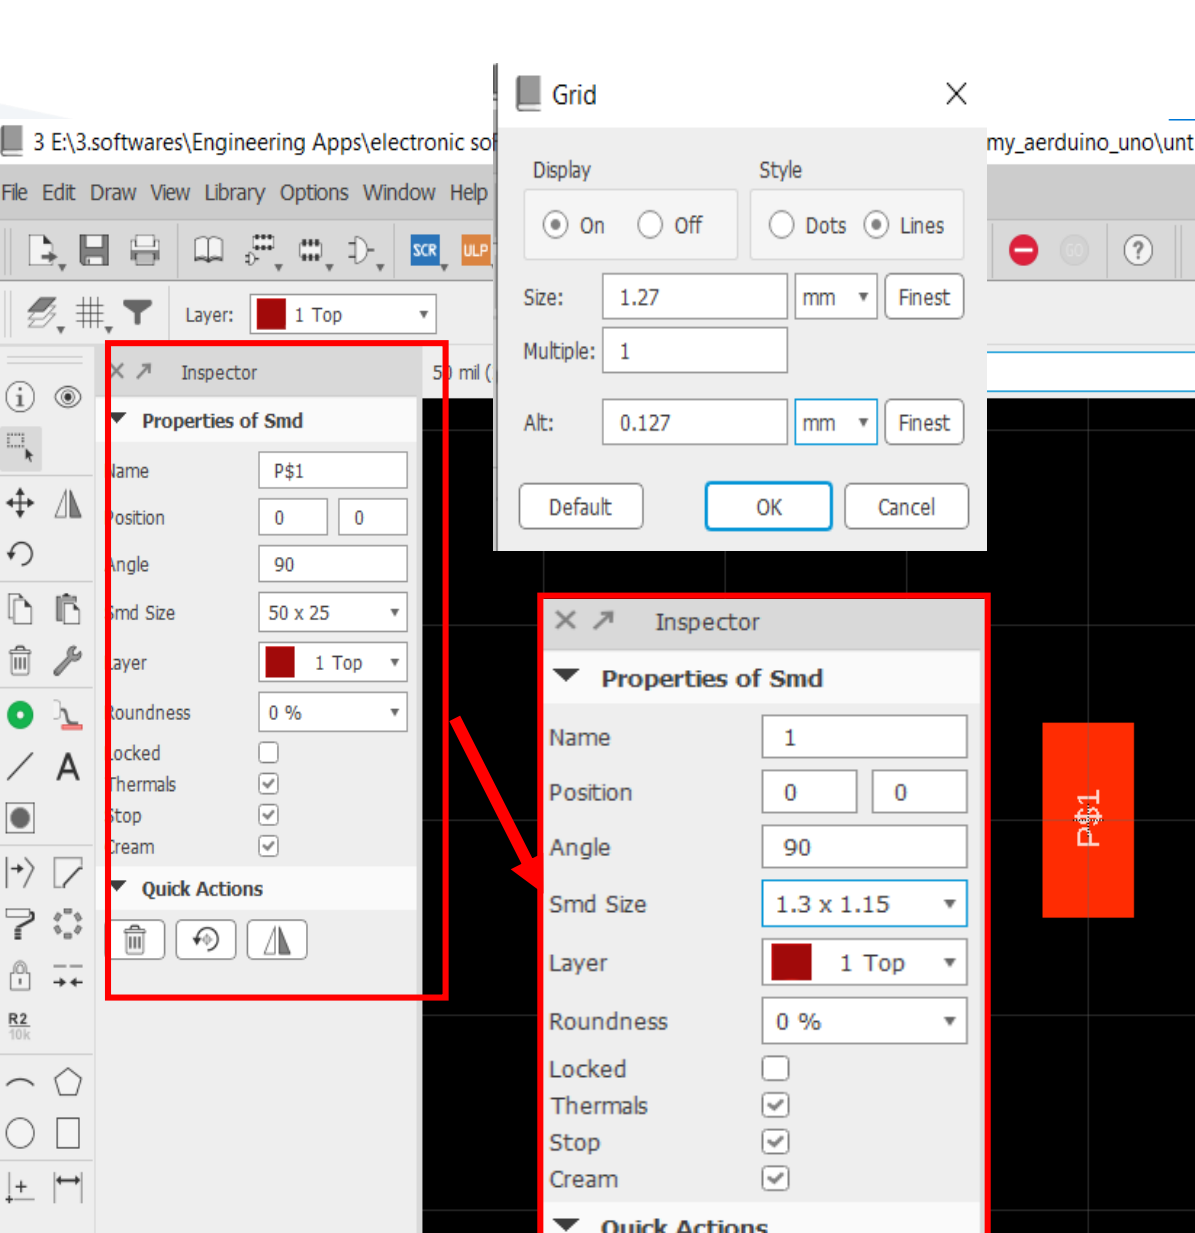

click ok  
then a warning message will appear . JUST CLICK OK

rotate it by right click then place it in the origin

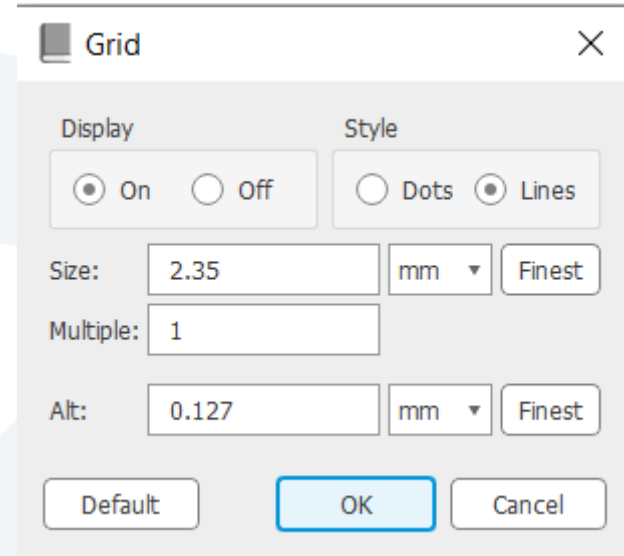

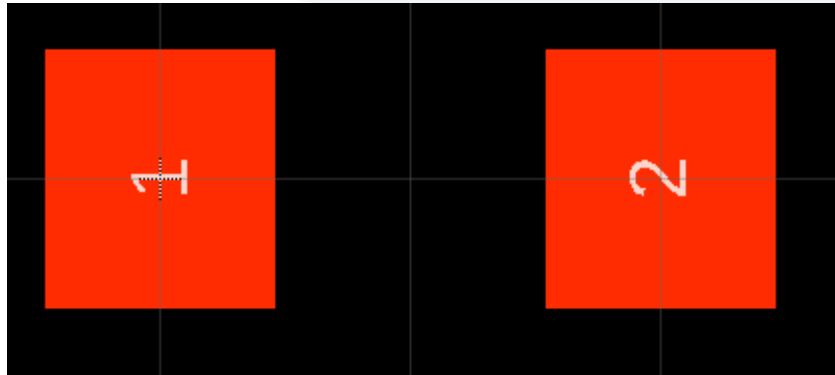

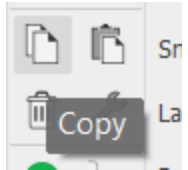

#### Recommended Solder Pad Layout

Model	A	B	L
CRM0805	$\frac{1.3}{(0.051)}$	$\frac{1.15}{(0.045)}$	$\frac{1.2}{(0.047)}$

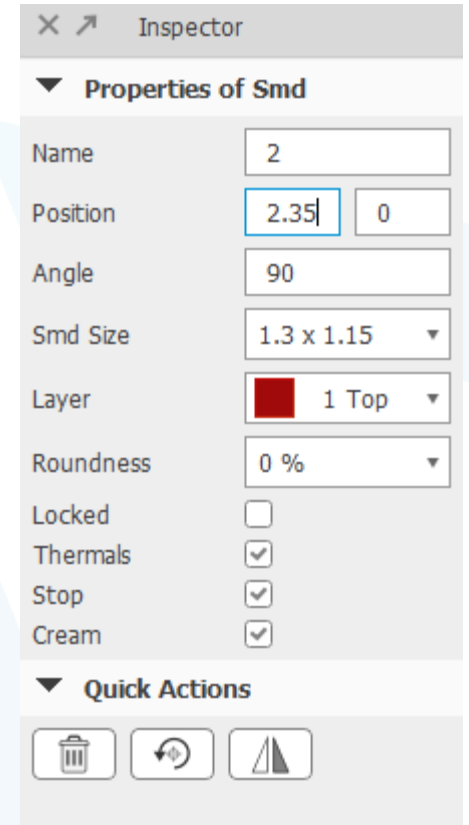

double click on smd to show the left window

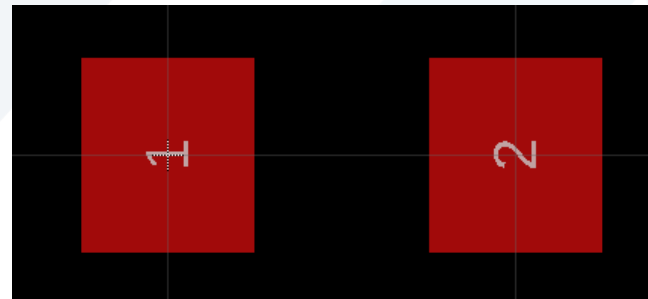

distance between the centers is  $B+L=2.35$

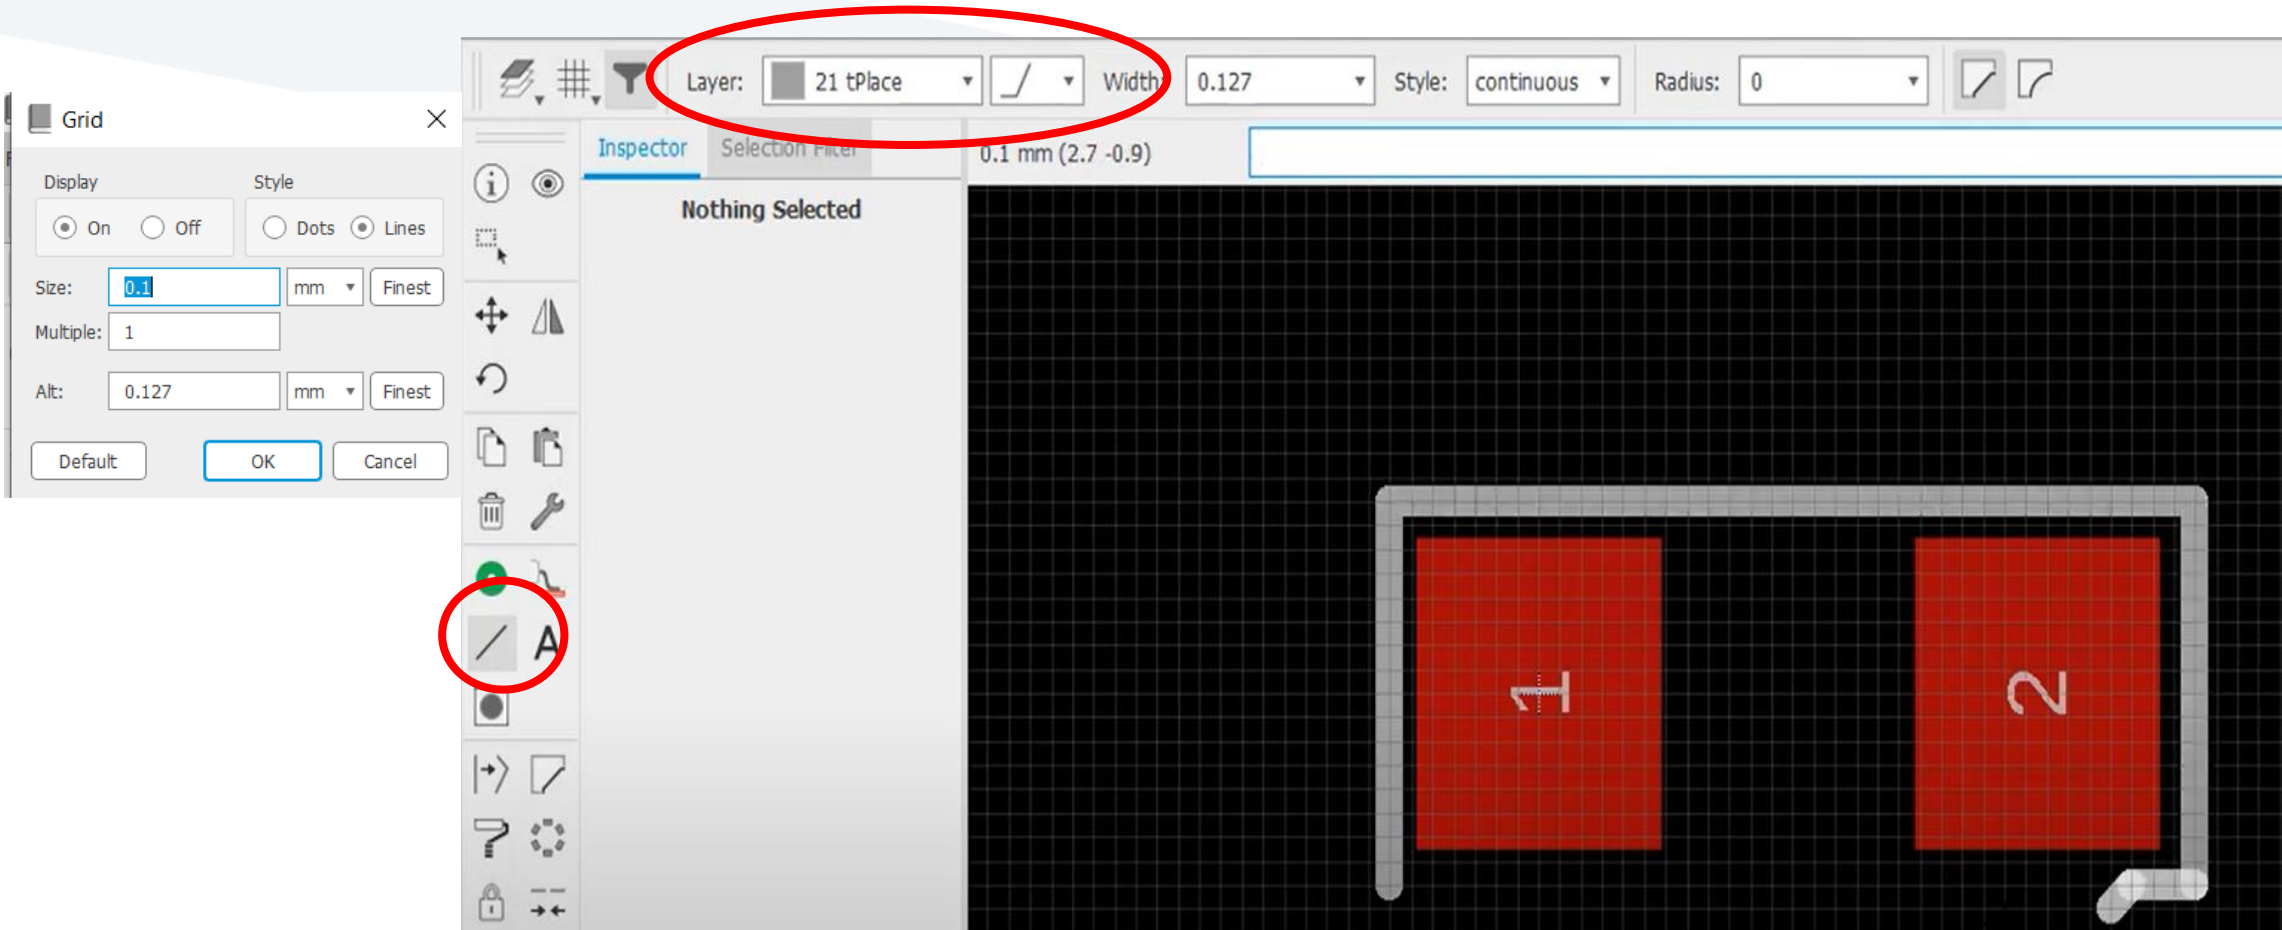

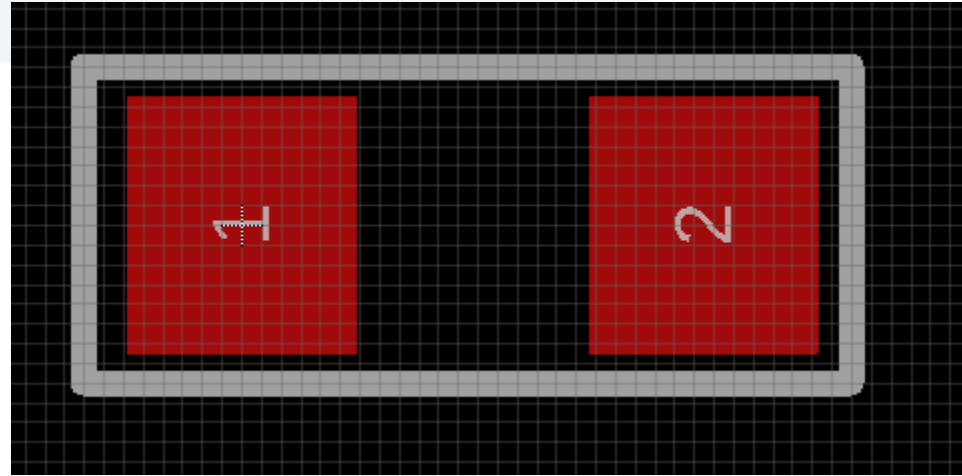

or

move 2 to the next center of the grid
